

COPD EDUCATION DAY JUNE 12, 2026

Learning Objectives:

1. Describe current and emerging pharmacologic therapies for COPD, including the role of biologics.
2. Evaluate persistent dyspnea in COPD patients to identify alternative or co existing conditions.
3. Integrate evidence-based preventive and supportive interventions into comprehensive COPD management.
4. Apply diagnostic and therapeutic skills, including spirometry interpretation and appropriate device selection, to optimize COPD care.

Time	Agenda	Presenter
